AMERICAN SOCIETY OF PLUMBING ENGINEERS
A NON-PROFIT ORGANIZATION - Local Chapters
are not authorized to speak for the Society

Gary Borgmann, CPD
President, C.I. Chapter of ASPE

From the President:

I should be all recharged and ready for work after being off on a long vacation, which I am, sort of, but I'm finding I would rather be back on the road exploring and seeing all of the things we had to miss due to time limitations. I guess they will have to wait until the next road trip. Plenty to do when retired! We spent most of our time in southern Utah and southwest Colorado. Pictures just don't do it justice. This cliché is often used in these situations, but it's true. You just can't get a grasp of the hugeness (if that's a word), and beauty of these vast open spaces. We did do one gearhead thing while out there... We attended "The World of Speed" at the Bonneville Salt Flats. I had never been and it turned out to be a fun day watching people and their cars, and motorcycles attempting to break some records. If you have never been out west, you should plan to do it at least once in your life. It is an amazing part of our beautiful country that you will never forget.

I'm sorry I missed our September meeting and seeing your smiling faces after such a long time! I'm told we had a fair turnout. I'll be there the October 21st meeting, how about you!?! Bryan Lee will be presenting on Regulatory Compliance for Water Efficiency. For more detail on that scroll down to Bryan's article

We still could use some suggestions on topics for future tech sessions. If you're like me and getting a little tired of the same old thing, let us know. Maybe you've attended some good educational sessions outside of ASPE recently? Please share with me, or Bryan Lee and we'll see if we can get those speakers to come talk to us too. And don't forget about the program on the "**Water Demand Calculator: Updating the Hunter's Curve Summit**" hosted by ASPE and IAPMO on November 4th from 9 a.m. to 5 p.m. CST (10 a.m. - 6 p.m. EST). As I mentioned in last month's article, the program will review the history of Hunter's curve and discuss what the future holds for the Water Demand Calculator. Our own Tim Wolfe, PE, along with his colleagues, Dan Cole, and Steve Buchberger presented on this at our May 2019 ASPE meeting. I'm sure this will be a very informative discussion and will surely affect the future of the Hunter Curve that we use daily in our industry. You can learn more at: <https://www.aspe.org/pipeline/registration-is-open-for-the-virtual-updating-the-hunters-curve-summit/>

Hope to see you all at the October meeting!

Best regards,

Gary Borgmann, CPD

High Purity and Industrial Water Systems

Greetings,

It was great having our members back together again at our September meeting. We look forward to seeing all of you again this month for our October meeting.

Our chapter would like to thank Brian O'Keefe and Will Sims from Oasis Water Coolers for their presentation on "Drinking Fountains and Bottle Fillers in a Post Covid-19 World." The considerations of water coolers and bottle fillers in plumbing designs is important as facilities reopen post COVID and new facilities are being designed.

For our October meeting, I will be presenting "*Understanding Regulatory Compliance for Water Efficiency in Commercial Plumbing.*" The presentation is sponsored by Sloan and Aspinall Associates, Inc. This course seeks to inform plumbing engineers and designers about the various aspects of regulatory compliance for plumbing fixtures. The course will review the history and adoption of plumbing codes, standards, and certifications. The course will also provide detailed analysis of how these can help reduce water consumption while maintaining maximum performance.

Our meeting will be held on October 21, 2021, at the Northside Events and Social Club. Time for fellowship is 11:30 am to 12:00 pm. The presentation and lunch start at 12:00 pm. We look forward to seeing all of you there. Please RSVP through the newsletter or ASPE.org website.

Thank you all for your support of our Central Indianapolis Chapter!

Bryan Lee

VP Technical, C.I. Chapter of ASPE

COURSE DESCRIPTION:

This course seeks to inform architects and LEED professionals, as well as plumbing engineers and designers, about the various aspects of regulatory compliance for plumbing fixtures. The course will review the history and adoption of plumbing codes, standards, and certifications. The course will also provide detailed analysis of how these can help reduce water consumption while maintaining maximum performance.

LEARNING OBJECTIVES:

1. Review the history and current status of codes and standards for interior commercial plumbing water efficiency and the water-energy nexus.
2. Understand the differences between various third-party certifications including IAPMO, ICC, NSF, and UL CSA, as well as UPC, cUPC, and UPC GREEN.
3. Discuss how the current codes and standards have reduced water consumption rates and how there is a lack of consistency between federal, state, and local regulations.
4. Understand the introduction of voluntary specifications for water-using urinals and the new flushometer-valve water closets and high efficiency flushometer valves to WaterSense, including differences in dual flush and MaP requirements.

ASPE CEU Provider: Education Units Issued 0.10 CEU or 1.00 PDH

THE INSTRUCTOR: Bryan Lee has been employed with Aspinall Associates, Inc. for the past 10 years. He is the territory sales manager for Central and Southern Indiana as well as Kentucky. He is also the Vice Presented of Marketing. He has held the VP Technical position with our Central Indiana ASPE chapter for the past 5 years. Bryan also holds a Construction Document Technician (CDT) Certification with CSI.
